

# I design and create websites

An all round web designer who's been making websites for over five years now. A whizz at website and UI design, front end development, branding and WordPress, looking for a fun team and exciting projects to work on.

## Part Designer | Part Coder

## Technical Skills

## Education

Master of Digital Media University of NSW - College of Fine Arts	2007 Distinction Avg
Bachelor of Computer Science University of NSW (UNSW)	2006 Credit Avg

## Professional Experience

### Freelance Designer & Front-End Developer

illumin8 Design (Founder)  
June 2005 - Present

Created my own digital design agency specialising in brand and web design. Having quite a broad role I was involved in creative direction, web design and development, client contact and branding which has given me great all round experience. illumin8 Design has successfully helped many businesses brighten up their corporate image while also allowing me to grow and develop my skills and experience.

### Senior Web Designer

Future House (Photon Group) - The Rocks NSW  
January 2010 - June 2010

Conceptualisation, design and development of a website templating system which was part of a website building application for businesses. Each website is comprised of a combination of blocks, templates, layouts, themes and colour schemes. The CSS Framework and dynamic web templates I created were pivotal parts of the application.

### Web Designer & Front-End Developer

Geekdom (Photon Group) - The Rocks NSW  
May 2008 - January 2010

Responsible for the branding as well as the design and development of several web applications. Instrumental in creating an automated website building application and CMS which increased our team's efficiency dramatically. Worked with the marketing team on print media, social media and email marketing campaigns.

### User Interface Designer

St. George Bank - Circular Quay NSW  
Jan 2005 - July 2006

User interface designer and one of two developers to create the "Branch of the Future" touch screen information kiosks. These kiosks were built in Flash and were placed in St. George branches for customers to use while waiting to be served.

## Get in touch

When I'm not making websites you'll find me blogging and tweeting about design, playing soccer, pumping iron or listening to music. I'd love to hear from you.
